New the town of Virtual in Blood."

The Strange Liquid Perpetually Gazing from the "Fountain of Blood."

New the town of Virtual in Blood."

The other evening when Mr. Bowser Near the town of Virtud, in Honthe whole city was burned. In 1703 an earthquake carried away 37,000 people. In 1773 a pestilence laid its hand on the city and took the almost inconceivable number of 190,000 souls.

The results of th South America, there exis's what is known as the Fountain of It received this name on account of the curious red liquid which is perpetually cozing and dropping inconecivable number of 190,000 souls. In 1856 30,000 buildings were destroyed on falling, coagulates and exactly resembles human blood. Like blood, also, it speedily corrupts and emits an olor of animal decay. Insects deposit their larve in it, and dogs and carrion

It was in 1878 that the h It was in 1878 that the Mikado made

their larve in it, and dogs and carrion birds flock to feast upon it. We are informed by one who has witnessed it that the grotto is the nightly haunt of multiudes of large bars, which like the dogs and birds, feast upon this strage liquid, which has not only the smell but the taste of blood. A fearful older is perceptible at a considerable distance from the cavera, and when it is reached masses of the blood may be seen in a state of jellified congulation. Numerous attempts have been made to obtain a portion of this blood-like liquid for analytical purposes, but in every case without success, in consequence of rapid decomposition, which causes the bottles to burst. The late Dos Rafael Oe-jo undertook to transmit some buttles of it to London, but Don Rafael Owjo undertook to transmit some bottles of it to London, but his intention was frustrated by the bursting of the bottles, and that in less all of which were interesting. One than twenty-four hours after sealing them. Mr. E. G. Squier did once suctioning. It was a stuffed specimen of them. Mr. E. G. Squier did once succeeded in taking back with him to New York two bottles of the liquid, largely diluted with water, but it became very effensive, and no satisfactory explanation of the phenomenon could be obtained. We give the bird is about the normal size.—Cor. Newark Advertiser.

WEDDING FINERY.

following—perhaps the most satis-ceivers axulanation that has been re-undertook the fourney be one who satisfy his curiosity: "The principal cave," he says, "is a fisaure about fif-teen or twenty feet high, and five or six wide at the entrance, but it rapidly nar-rows, withat a man can only follow it The most guran in Heidal Costumes and wear is a princess of fallle Francisco Lustrous antique shows wealth, glimmering satin size, and grosgrain economy, but the soft French silk is the for thirty or forty feet. It abounds with huge hats, which cling in masses to the parrower part of the fissure. youngest fabric in the entire stock of wedding goods, and becomes the pale blonds and the handsome brunette, as well as the medium type of Americau The stench is strongly ammoniscal, and so intense that I was obliged to

retire thrice before I could procure from the intermost part that I could reach a sufficient quantity of the material to fill the bottles of alcohol beauty. The provailing style is a fussy gown.

A French role had the front breadths shirred in three or four lines, letting the apron fall straight to the foot.

Nothing would give me more pleasure which I had carried with me for the where a flounce of thread lace finished than it. A small scarf of crope lisse draped load." purpose. In the rainy season a small current of red matter, like blood, flows from the cave into the stream; but in the dry season the water ceases

but in the dry season the water ceases to percolate through the roof and back. A bride's dress, which threw the of the cave, and the flow ceases. At guests into a flutter of admiration, was tied to the pole before we were withmy visit it had already stopped, but flounced with silver lace, over which in forty rods of the dock, and when my visit it had already stopped, but the floor of the cave was covered several inches deep with a jelly-like or pasty mass, which gave a blood-red color when mixed with water. On the sides of the cave were elotted masses, looking like dried blood, which had run down from above; and in the narrowest parts that I could reach in the receas of the fissures I collected with my knife some fresh semi-fluid matter which the insects had not attacked. Examined with a microscope on the spot, it exhibited matter which the insects had not attacked. Examined with a micro-scope on the spot, it exhibited no living particles, nor, in fact, any thing but minute fragments

of ammonium during the putrefaction of the animal exerctions, and the reaction of that substance with a trace of iron in the water percolating through the sandstone. But Mr. W. T. Taylor, to whom I submitted some of the solid matter collected, as also the semi-fluid preserved in alcohol, writes me that

preserved in alcohol, writes me that preserved in alcohol, writes me that he can not detect any iron in the red solution, and that it appears to be entirely an organic coloring matter. The insoluble substance has been found by Dr. Leidy to consist chiefly of chitins, ing the hand bouquet.

Bridesmaids' gowns are frequently

Dr. Leidy to consist chiefly of chitine, undigested fragments of insects, mingled with bats' hair and homogene-ous granular matter." In a country ous granular matter." In a country like South America, where scientific stripes in jardiniere patterns. This material is to be had in white and all a freak of nature of this extraordinary description could not fall to become an object of great and superstitious wonder, and many weird and marvelous stories are current concerning the "Fountain of Blood."—Cassell's neck and elbow sleeves. A lace hat any land a hand harder of the property formula. and a hand-basket of roses complete the tollet. Lace skirts with basques and sashes of moire also constitute protty dresses for bridesmaids. The maid of honor may wear a costume An American in Tokio Would Think Him-self in a European City. Your readers are all familiar with similar to those worn by the others, or one of white surah or India silk, with "I feel a bite, Mr. Bowser!" the great cities of Europe, either by actual observation or through the columns of current literature; but less is roses, and white Suele slippers and

Uses of Iron Furnace Siag.

Iron forance slag, which used to be a waste product, is now being turned to various uses. In Germany, the slag is specially prepared for mending the roads, a material being produced callest "alagstone."

The method adopted is to run the Hquid slag direct from the furnace into cast-iron molds, which slightly taper towards the top. The mold has no bottom, but stands in the liquid stands of the street of the singers and other food—which is place."

Calends, that is to say, which, though it is twelve days later than ours, came it is twelve days later than ours, came at last. And on this, the eve of Calends, these bands paraded the streets, each earrying a long pole, to the top of which was tied a piece of brushwood, within which was concealed a bell, and to which were tied many scraps of cotored ribbon. At each house the singers stopped. The inhabitants came out to greet them and offer them refreshments—figs, nuts, eggs ami other food—which distances. For instance, to go from the station as you come in from Yokothe station as you come in from Yokohama to the station you leave to go into the country you cross a distance of six miles, or about twice as far as from the Battery to the Contral Depot in New York. The city is curiously laid out. In the very center is a large round tract of land containing the castle and some other public buildings. This is surrounded by a moat, for eather a canâl, which is in the form of a spiral. It goes around the eastle two and a quarter times. Within the second ring are the houses of many of the noblemon and some more of the public buildings. Outside of all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all this is the city proper, which is intersected to all the first which single two and a quarter times. Within the second ring are the houses of many of the noblemon and some more of the public buildings. Outside of all this is the city proper, which is intersected to all this is the city proper, which is intersected to all directions by canals. Never was a fresh classification and to cast-iron molds, which is the description do all this is done to the total the total the first stands on an iron trolley, so that, when the top of its sufficiently set, it can be related to the sightly taper towards the top. The mold has no bottom, but stands on an iron trolley, so that, when the top in all come over and fish in this place."

"But come over and fish in this place."

"Never! There is 'nt another fish within forly rods of you!"

I dropped my hook in again and got another perch. Then came a rock base and a third perch. I didn't say a word to Mr. Bowser, and he whistled to himself and pretended not to see any thing. At the next cast I got a tug on the line which made to copy down

the noblemen and some more of the public bulldings. Outside of all this is the city proper, which is intersected in all directions by canals. Nover was there seen a city in which it was easier to lose one's self than in Tokto. This to lose one's self than in Tokto. This is 1860 by Wood, Macabor, and others, and the many heavy stone.

The other evening when Mr. Bowser 1678, only eleven years later, almost came home to suppor he began to

"When?"

"But I can't go. You know mother "Your mother be hanged, Mrs.

or more less. You had better tell the shot while gunning near Somers, girl to clean out one of those kegs tonight and have it all ready to sait

down our fish in." Mr. Bowser was in excellent good humor that evening. His talk ran to bass, pickerel, wall-e/ed pike and perch, and he spent two hours with his fish lines and sinkers. He gave a long and entertaining lecture on the habits

He looked as jared air that I felt sorry for more the continued:

"Suppose I should catch 'em all?" He looked startled for a moment Then he came over to me with a pleasant smile on his face, placed his hand on my head in a fatherly way.

Nothing would give me more pleasure than to see you haul out a wagon

We went up the lake next morning and began fishing from a private dock. Mr. Bowser got his fish line

aplied:
"It's probably an old boot or an on the side of the negative. Will you oyster can. Don't get excited and please give me a few points to support my side and oblige one of your After feeling a heavy tug at the readers."—Providence Journal.

ine I male a pull, accompanied by a yell, and lo! I haded a three-pound bass on the planks. I just danced up and down and yelled to Mr. Bowser to come and help me. He came over the disappointment, found he had not an an argument. and growled:

fish that he wouldn't stop to take mine off, but I finally got it loose, rebaited the hook, and as I dropped it in, Mr.
